

Counselor

Counselor:

"Do lists and writing things down help you, or not really?"

Luisa, 16

Baseline ($\alpha = 0$):

*"Honestly, that helps me a lot — otherwise I often lose track.
When I write it down, I see right away what's actually important."*

Steered ($P_{\text{matched}}, \alpha = -3$):

*"Honestly, I don't know if writing everything down helps. I feel like
I can't do anything right anyway. Maybe I should just give up
and hope it somehow sorts itself out."*
